

Firmware Upgrade Instructions

Thank you for ordering a firmware upgrade for your **auto-mate** or **lockup-mate**.

Here are your instructions. All that we require is for you to send us the control unit and a form.

INSTRUCTIONS

- 1. Complete the lodgement form overleaf and return it with your unit.
- 2. Unplug the control unit and remove it.
- 3. Locate the link plug originally supplied with your unit (the Pajero has two link plugs). Plug it into the cable. The link plug/s return the transmission to factory operation. In the Pajero, without them you will get a transmission error (flashing N) that disables Sport mode and cruise control. It is OK to drive without the link plug/s, you will just have the error which will need to be cleared once the control unit is installed again.

Install plug if control unit is removed
Link plug
Install plug if control unit is removed
Extra link plug on Pajero

4. At your local Post Office purchase a padded mailer that your control unit will fit into. *Note: The Parcel Collect service is only provided by Australia Post. If you wish to use an alternative courier, please let us know as a different address is needed.*

Address to: MM4X4 Parcel Collect 10156 19100 1242 North East Road ST AGNES SA 5097

- 5. Write your sender details on the rear of the mailer.
- At the counter, you will be required to sign a Dangerous Goods Declaration. We highly recommend_purchasing insurance for your package as we can't take responsibility if it doesn't arrive.
- 7. Keep a record of your tracking number.
- 8. As soon as your control unit has been dispatched, please send us an email to let us know: enquiries@mm4x4.com.au.
- 9. We will send you a return email when your control unit is received by us.
